WORK EXPERIENCE

Meta

Data Engineer, Product Analytics

Dec 2025 – May 2026

Bellevue, WA

- Led the development of the Instagram Edits Effects Performance automated regression detection and AI-driven remediation initiative, used by 14 engineers on the IGLU Graphics Engineering team, which drastically reduced regression fix times for effects. Designed scalable data models, orchestration pipelines, and monitoring dashboards that supported closed-loop agentic performance optimization workflows.
- Collaborated with the Instagram Edits Foundation team to design and implement video playback performance metrics, enabling A/B testing and application health monitoring for iOS and Android releases, which reduced playback experience regressions by 20%.
- Built semantic data models and AI-ready analytics metadata for the Instagram Edits domain, partnering on evaluation and hill-climbing initiatives that improved AI query evaluation accuracy from over 90%.

State Farm

Lead Data Engineer

Feb 2020 – Nov 2025

Bloomington, IL

- Led a large-scale cloud migration project to transition on-premise services to AWS, adhering to business requirements and meeting SLAs. Strategically redesigned the architecture from Serverless Design to ROSA EKS, cutting costs by 40% and boosting average performance by 70%.
- Designed and maintained real-time and batch data pipelines using AWS Kinesis Data Firehose, ROSA, SNS, Glue, Lambda, and S3 to ingest, transform, and curate analytics-ready datasets. Implemented automated data quality validations and monitoring frameworks to ensure data reliability and governance for 20 downstream product areas.
